

METHOD OF PROMOTING BONE GROWTH WITH HYALURONIC
ACID AND GROWTH FACTORS

5

Abstract of the Disclosure

10 A bone growth-promoting composition is provided
comprising hyaluronic acid and a growth factor. The
composition has a viscosity and biodegradability sufficient
to persist at an intra-articular site of desired bone growth
for a period of time sufficient to promote the bone growth.
Preferably hyaluronic acid is used in a composition range of
0.1-4% by weight and preferred growth factor is bFGF,
present in a concentration range of about 10^{-6} to 100 mg/ml.
